GUARANTEE & WARRANTY INFORMATION

Muses Grates are crafted to the highest manufacturing standards, meeting both Australian Standards and Watermark certification.

Carefully designed to suit a variety of indoor and outdoor applications, Muses Grates are ideal for use in bathrooms, outdoor areas, and around swimming pools.

All Muses Grates are **triple anodised and come with a rust-proof lifetime warranty, as well as a 25-year UV warranty, ensuring durability for both residential and commercial environments.**

Our grates are **highly durable and rust-resistant**, and can be easily cleaned with any household or commercial acid-free cleaning products.

Muses offers a rust-proof warranty, provided installation is carried out by a licensed plumber and correct cleaning procedures are followed. To maintain the warranty, ensure no metal debris is left on the grates at any time.

Please note: The warranty is void if the product is not installed by a licensed plumber.

Load Rating: Class A, AS 3996.

Car weight up to 10 tonne.

INSTALLATION GUIDELINE

All Muses Ceramic Grates are watermarked, rust proof and have 20-year UV protection warranty. Muses Ceramics installation guidelines are following the Australia Standards, AS 3740:2021, 3500.1:2021 & 3958-2007

Installation and care are very important for the maintenance of your grates. Please read the instruction and care information before installing.

1. Licensed installation

- Grates are to be installed by a licensed plumber.

2. Use silicone only

- Grates, tile inserts, end caps & outlets are to be installed with silicone only.
- Grates are NOT to be installed with slurry, glue or any cement-based products.

3. Avoid cement contact

- Grates are not to have direct contact with cement based or screeded cement products.

4. Install after tiling

- Grates should be installed last after tiling, grouting and cleaning with direct stick of silicone only to waterproofing membrane.
- Grates are not to have direct contact with cement based or screeded cement products.

5. No grout at tile joints

- Silicone must be applied to grates and tile joint - no grout or cement based products.

6. Tile inserts

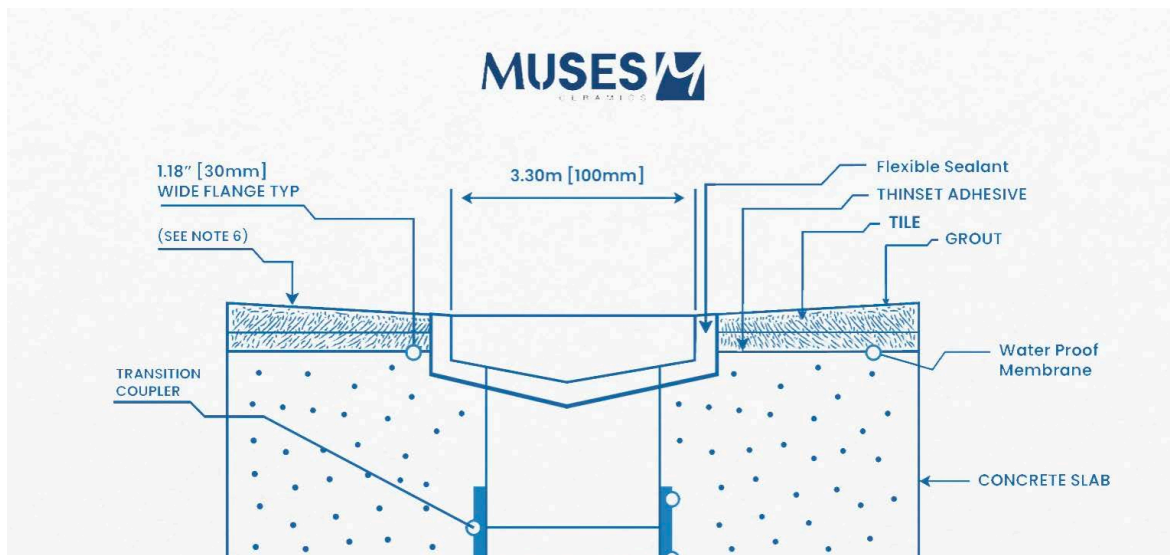

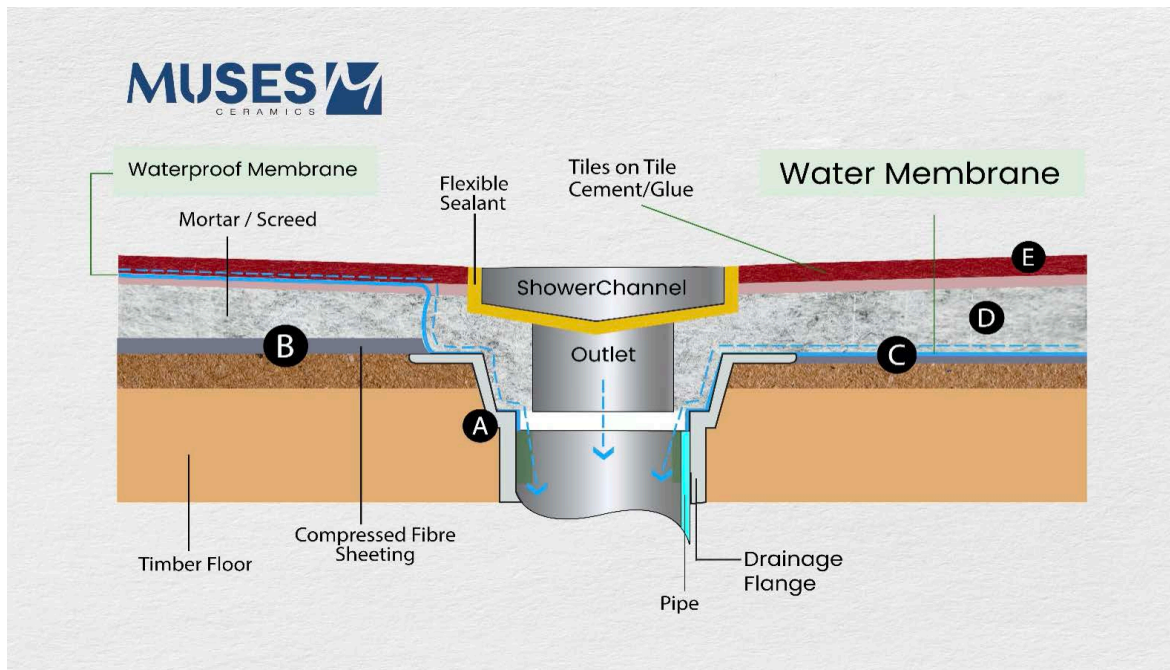

- Tiles used for tile inserts must be stuck into the body area with silicone only.

7. Cleaning guidelines

- Maintain with your everyday household cleaning products, do not use commercial grade or acid-based products for cleaning. Use a soft cloth for wiping. **Household Domestos contains acid and will discolour your grates.**
- Do not leave any metal objects, cement, cement-based or grout products on grates as this will cause discoloration and rust. If any cement-based products come in contact with your grate, clean instantly.

Choosing where to put your waste outlet is easy with our 80mm & 50mm hole saws. You can choose where you want your outlet to be located. Application of your waste and end caps is easily done with silicone. Waste outlet applies to the outside/underside of the grate / insert body.
